-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE THREE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

On page 3, line 21, "There" must not be capitalized.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-15 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It appears that in claim 1, line 7, "said layer" should be changed to - said support means".

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, as best understood are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Dombrowski et al.

Note elements 115, 116, 117.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-21, and as best understood, claims 7-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gold (note col. 3, lines 5-9) or Ive No. 089 (note

especially col. 6. lines 40-59) or Dunne et al (note col. 3, lines 12-14; 50-58) teaching applicant's basic device, but not the use of a bendable wire, in view of Dombrowski et al, teaching the use of a bendable wire (115) in a similar device.

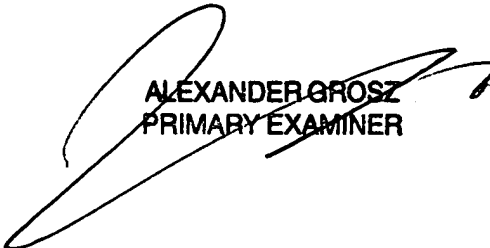

It would have been obvious to one ordinarily skilled in the art at the time the invention was made to have used a bendable wire in Gold's, Ive's or Dunne et al's device, because Dombrowski et al recognizes the desirability of using a bendable wire in a similar device, in order to more securely support an infant's head. The varying of the location of the snaps, is suggested by the adjustability of the head support.

Pepys et al (note col. 2, lines 46-49) and Ive No. 351 (note Figs. 2, 7) are cited as relevant art.

McCarty (or record) teaching the use of a PVC tube 18, is noted.
